Nanterre, 6 September 2006

“Expo Agua Saragoza 2008” awards a €300 million contract to Elyo (SUEZ Group).

The consortium headed by Elyo Ibérica has been chosen for the concession of the heating and cooling system that will supply the International Exhibition “Expo Agua Saragoza 2008” organised in the capital of Aragon between June and September 2008.

The turnover for this 35-year concession is €300 million.

Elyo takes care of the build and operation of the heating and cooling system, which, in time, will include a 7-MW cogeneration and 33-MW cooling equipments. The system will supply 26 buildings, i.e. a surface of 180,000 m² built over an area of 120 hectares laid out in a loop of the Ebro to host the Exhibition. When the Exhibition closes, the site will be reconverted into a business and tertiary area.

This success confirms Elyo’s expertise in the field of heating and cooling systems. In fact, in 2004, Elyo Ibérica (through its subsidiary Districlima) put into operation the first Spanish urban heating and cooling system in the “Forum 2004” district in Barcelona and was chosen, in 2005, for the extension of that system to the Poble Nou district.

In Portugal, Climaespaço, subsidiary of Elyo, operates the heating and cooling system it had realised for the 1998 World Fair in Lisbon.

Lastly, in Paris, Elyo operates the cooling system (through its subsidiary Climespace) and the heating network (through its subsidiary CPCU) of the city.

Elyo is part of SUEZ Energy Services, the European leader in multitechnical services. Suez Energy Services employs 66,000 people and achieves revenues of €10.4 billion. Suez Energy Services is one of the four business lines of the international industrial group, SUEZ, quoted on the Stock Exchange.

The consortium headed by Elyo Ibérica includes other subsidiaries of SUEZ in Spain, and two local banks: Ibercaja and Caja Immaculada.
